

Customize Worksheet Using PowerPoint File

We have included the PowerPoint file with which we created the Organ Parts & Path of Wind worksheet so that you can customize it for your own use.

You can add YOUR logos and website addresses.

We highly recommend using this worksheet as an invitation to the next local organ concert. If you maintain an **events page** on your website, be sure to include its URL on the worksheet so that the people who have built your Orgelkids kit can know where to go to further their new interest and encounter a full size organ in concert.

Example:

Instead of just this:

“Now that you have built a pipe organ and know how they work, go check out a REALLY BIG organ in concert”

Change it to this:

Now that you have built a pipe organ & know how they work, go check out a REALLY BIG organ in concert! Visit www.HartfordAGO.org for local events & concerts.
